Making Justice Possible

Best Wishes for the New Year!

Our Year in Review...

It is hard to believe that we opened our doors approximately a year ago, on January 6, 2014. We knew that if we worked hard, our firm would persevere and thrive. Thanks to our loyal and trusting clients, we worked hard and had a tremendously successful year! As lawyers, our success is often measured in verdicts and settlements. After all, these are results to our clients. Over the past year, our team of attorneys have had many favorable verdicts and settlements. Brittani Hassen tried an automobile accident case in Beaver County and received a jury verdict in the amount of \$75,000.00.

Ms. Hassen, along with Tony Mengine, mediated and resolved a West Virginia Auto accident claim in the amount of \$400,000. George Kontos recently tried a slip and fall case in Allegheny County. Although liability was difficult, he successfully obtained a jury verdict in the amount of \$86,000. Mr. Kontos, along with

Katie Killion, also resolved a complex medical malpractice case for \$600,000. Most notably, Tony Mengine and Katie Killion recently tried an automobile case against several defendants. The trial lasted many weeks, but they were able to obtain a 15.8 million dollar verdict for their clients. These are just a few examples of our hard work on behalf of our clients. As you can see, we often have a team of attorneys working on individual client cases. We firmly believe this contributes to our successful results. The most rewarding part of being an attorney is making justice possible for our clients. As mentioned, the measure of our successes are the results we obtain on behalf of our clients. We attribute our past success to our loyal and deserving clients. The past year has been tremendous for our firm and our clients. We look forward to working just as hard on behalf of our clients in 2015. As always, we will continue making justice possible.

DO I HAVE A CASE ?

...

- I was involved in an auto accident and sustained injuries...
- I was shopping at a local retailer and slipped and fell on a substance...
- I purchased a product and used it as intended. The product injured me...
- I recently underwent a medical procedure with unexpected symptoms and adverse side effects...
